The breadth of evidence outlined for each subject will apply to the majority of students in the cohort.

The guidance for students, parents and guardians published by the JCQ states:

*'Your teachers will tell you which pieces of work will be used as evidence to inform your overall grade. You will have the opportunity to raise any concerns about the evidence being used, for example, if the evidence was affected by personal circumstances, such as illness. Your teacher will make the final judgement about what evidence is to be included - this is not a negotiation.'*

If you have made the college aware of mitigating circumstances that have applied during the time frame over which you have studied the subject, the range of evidence that will be used to determine the Teacher Assessed Grade may differ.

If you have not made the college aware, but you believe that you have been subject to mitigating circumstances during the course of your study of GCSE/Vocational subjects, please email:

## Cambridge National Sports Science

The students' teacher assessed grades will be based on their outcomes in the external assessment taken in January as well as the coursework that they have completed over the duration of the course. Where students did not sit the external examination in January they have completed assessment materials which cover the same content and the outcomes of these will be used to go towards the Teacher Assessed Grade judgement.
